All Galvaneal Steel Cage, Subfloor, and Entry Step module provides maximum corrosion resistance.

Seamless Fiberglass exterior with full steel cage backing the full height of the bus eliminates body skirts for full height strength and durability. Front and rear Fiberglass caps are attached to the sidewalls using Bulb Seal technology for a caulk free exterior minimizing maintenance.

European style heavy duty Fiberglass roof is stronger than fiberglass used in other buses and provides superb impact resistance.

Spacious passenger area allows generous knee space and allows seats to fully recline. The 78" interior height allows for **Draft-Free rear air-conditioning**. The evaporator is mounted in the front bulkhead to provide the most efficient A/C and minimize noise. The vents are positioned to allow the air to flow along the ceiling, **evenly distributing cooling throughout the bus**. No more complaints about cold drafts in the front and poor airflow in the rear!

Frameless windows are 45" wide, 9" wider than other cutaway buses, providing panoramic views for the passengers. The tempered tinted glass is 3/16" thick, **33% thicker than the competition**, providing superior sound proofing and increasing the efficiency of both the A/C and heaters.

Passenger floor is only 3" above the cab floor providing great forward visibility . The Copilot bulkhead is trimmed to allow the seat to fully recline and expand the forward view.

Front Bulkhead Mounted **26" Flat Screen TV with DVD Player and three additional monitors** angled for the best visibility provide a sharp clear picture for all passengers.

Curved Overhead Parcel rack with safety netting and trimmed to match the seats with accent stripes provides a secure and convenient area for coats , briefcases, or other small items.

Glitz passenger seats are fitted with **USR retracing seat belts**, a **US Arm** at each aisle seat, and double **USB ports** for charging cell phones or powering your lap top computer.

Stainless Steel Wheel liners with Braided Stainless Steel valve extensions for the inner wheel make checking proper tire pressure a snap..

Rear Luggage room with Double Doors for easy access to passenger bags; a real plus when you are making multiple drop offs....no more removing center bags to access luggage on the sides! The shelf maximizes the available space. Bright white inside and exterior lights make night time operations much easier.
