

KSIR® M-2 Pro Touring Freightliner

The *KSIR Pro Touring M2* is rated as the quietest, best riding bus of all the buses in the Medium Duty category. This is due to our custom, hand built construction featuring Galvaneal steel exclusively including the body cage, subfloor, roof trusses, and even the step wells. Thicker Frameless windows and R45 density block insulation in the walls effectively block out road noise while keeping the passengers cool in the summer and warm in the winter. The Airliner rear air suspension provides excellent stability in cross winds, **reduces body lean in cornering and exit ramps.** The **"Draft Free"** rear A/C unit is mounted in the front bulkhead, and directs air down the ceiling to ensure an even flow of cold air throughout the bus eliminating drafts on the forward passengers. All the A/C components are mounted behind an attractive padded panel; only the vents are visible. Inside this enclosure the evaporator is surrounded by heavy insulation which increases the efficiency of the A/C and also quiets the noise of the A/C unit.

Up to 42 passengers in addition to the Driver & Copilot (Model M2-400 40").

Sizes from 36' to 40' available.
